Accrets Cloud Solutions
Modern Infrastructure, Real Freedom

One cloud doesn't fit all. That's why we design infrastructure strategies as unique as your business.

What is OpenStack?

Instead of updating VMware at a growing cost, why not move to OpenStack?
OpenStack is a powerful, open-source cloud platform used by thousands of organizations globally to build private and public clouds. It's scalable, secure, and built for cost-efficiency.

MANAGED
Get full peace of mind with cloud systems built and managed by engineers who treat your infra like their own.

HYBRID & MULTI-CLOUD
Flexible architecture across on-prem, public cloud, and private environments. We help you avoid vendor lock-in and optimize costs.

END-TO-END
From assessment to 24/7 monitoring, we partner with you across the full lifecycle of your cloud journey.

Our Complete Cloud Solutions
Infrastructure-as-a-Service (IaaS)

Private Cloud Solutions
Enterprise-grade private cloud, tailored to your performance and security needs.

VMware Replacement
Migrate to open platforms without compromising reliability.

Edge-Ready Deployments
Deploy infrastructure anywhere, from data centers to remote locations.

Cloud Connectivity

Ensure low-latency, high-performance connections to your cloud environments.

- **Direct Connectivity**
  Build secure tunnels via IPSec, VPN, or physical links.

- **Multi-cloud Networking**
  Connect across AWS, Azure, or your own data center seamlessly.

Disaster Recovery-as-a-Service (DRaaS)

Protect your data and systems from disruption with real-time backup and recovery solutions.

Off-site infrastructure hosting

We maintain private cloud environments in Tier 3 data centers (including production and DR locations), eliminating the need for clients to invest in or manage redundant physical IT hardware

Managed Backup and Replication

Regular data backup and remote storage are handled seamlessly, ensuring your data remains safe and recoverable

Failover Orchestration and Periodic DR Rehearsals

The team documents detailed step by step procedures, leads rehearsals, and executes failovers when needed—ensuring readiness and minimizing risk during actual events

Customized RTO & RPO Planning

Collaboratively, define acceptable Recovery Time Objectives (downtime tolerance) and Recovery Point Objectives (data loss tolerance). Accrets then designs a service aligned with your budget and risk profile

Remote Work Enablement

In cases like office outages or pandemics, Accrets can help staff shift operations remotely (e.g. telecommuting), supporting business continuity

Software-as-a-Service (SaaS)

Go beyond eInvoicing—organize, access, and protect your business documents with ease.

ASSIST.biz isn't just for invoices. It's your centralized hub for managing financial records, client files, compliance documents, and internal business paperwork—securely stored in the cloud and accessible anytime, anywhere.

Accrets International positions itself as a Microsoft 365 (formerly Office365) reseller and managed service provider, helping businesses adopt, configure, and maintain enterprise-grade Microsoft 365 solutions.

Setup	Migration	Ongoing management

Why Accrets?

✅	✅	✅	✅
15+ years of engineering experience	Freedom-first approach (no vendor lock-in)	Built for cost-efficiency and scale	Transparent, people-first partnerships

Let's build your future-ready infrastructure together
